

Product Name: **SINGLE STAGE**
Product Description: Single stage boost controller
Product Number: TS-0104-1001

IMPORTANT NOTES ON YOUR BOOST CONTROLLER

- Use only silicone hose that is the correct size and pressure rating for your application when fitting your boost controller – other hoses will be effected by heat and will eventually crack or split which could cause excessive boost pressure and engine damage
- Ensure that all plumbing is secured with clamps
- Your boost controller should be mounted at least 100mm from any heat source
- A Turbosmart Fuel Cut Defender may need to be used in conjunction with your boost controller – refer to www.turbosmart.com.au
- **The boost dial has a left handed thread, be sure not to over tighten as this will damage the boost controller**

RECOMMENDATIONS

- **Turbosmart recommends that the Air Fuel ratio is checked once boost pressure is set**
- **Turbosmart recommends that boost pressure is set using a Dynamometer and not on the street**
- **Turbosmart recommends that a accurate boost gauge be permanently fitted to the vehicle**
- **Turbosmart recommends that your boost controller is fitted and adjusted by an appropriately qualified technician**

HOW TO INSTALL YOUR BOOST CONTROLLER

TOOLS REQUIRED

General mechanic tools

ELECTRICAL CONNECTION

- The Blue wire is positive and the Brown wire is negative
- Extend and connect the Blue wire through the switch to a fused 12 volt ignition supply – Important, failure to connect to an ignition supply may cause the battery to go flat and may result in damage to the product
- Check that the power source can accept an additional 1amp load
- Connect the brown wire, with crimp supplied, to a solid ground point on the chassis

1) INTERNAL WASTEGATE SETUP

- Allow the engine to cool down before installing your boost controller
- Locate the pressure source port and the wastegate actuator port on the turbocharger assembly (refer drawing 1)
- Remove the factory boost control solenoid if fitted from the boost pressure supply port while leaving the solenoid connected to the ECU
- Install the SSBC Tee piece in the wastegate pressure line with the wastegate arrow pointing towards the wastegate actuator
- If your wastegate actuator has additional ports, these will need to be blocked
- Secure all silicone hose ends with hose clamps
- Mount your boost controller bracket onto the vehicle, and then attach the boost controller onto the bracket with the supplied screws
- Make sure the boost dial is turned completely anti-clockwise before making adjustments.

HOW TO INSTALL YOUR BOOST CONTROLLER cont.

2) EXTERNAL WASTEGATE SETUP

- Allow the engine to cool down before installing your boost controller
- Locate the **bottom port** on the external wastegate and the pressure source port (refer Drawing 2)
- Install the SSBC Tee piece in the wastegate pressure line with the wastegate arrow pointing towards the **bottom port** on the wastegate
- Secure all silicone hose ends with hose clamps
- Mount your boost controller bracket onto the vehicle, and then attach the boost controller onto the bracket with the supplied screws
- Make sure the boost dial is turned completely anti-clockwise before making adjustments.

Drawing 2

3) PARALLEL TWIN TURBO SETUP

- Allow the engine to cool down before installing your boost controller
- Locate the wastegate actuator ports on both turbochargers and a pressure source port (refer Drawing 3)
- Remove the factory boost control solenoid if fitted from the boost pressure supply line
- Install the SSBC Tee piece in the wastegate pressure line with the wastegate arrow pointing towards the wastegate actuators. Be sure to keep the hoses joining the wastegate actuators at equal lengths
- Secure all silicone hose ends with hose clamps
- Mount your boost controller bracket onto the vehicle, and then attach the boost controller onto the bracket with the supplied screws
- Make sure the boost dial is turned completely anti-clockwise before making adjustments.

Drawing 3

*Note for sequential turbo systems: Sequential turbo setups can be complex and vary from car to car. Please contact your local Turbosmart dealer for more details

SETTING BOOST PRESSURE

IMPORTANT NOTES ON BOOST PRESSURE ADJUSTMENT

- Adjustment to your boost controller is made by rotating the **Boost Dial**
- Rotate in a clockwise direction to increase boost and the reverse direction to decrease boost
- Before making any adjustment, the **Boost Dial** will need to be fully closed (anti-clockwise)

Step 1: Apply full load to the engine in a high gear (at least 3rd or 4th gear) at full throttle and note the boost pressure

Step 2: To increase the low boost setting, rotate the **Boost Dial clockwise** (maximum of 1 complete revolution at a time)

Step 3: Apply full load to the engine and note the boost pressure

Step 4: Compare the actual boost pressure with the desired boost pressure. If the actual pressure is below the desired pressure, return to step 2. If the actual is above the desired boost then decrease by rotating the **Boost Dial anti-clockwise** and return to step 3.

\

TROUBLE SHOOTING

The following points should be checked if you find that your engine is developing excessive boost, the boost pressure is fluctuating or the desired boost level cannot be achieved. Please note, the following checks will cure 99% of problems experienced when fitting a Turbosmart boost controller.

- Check that the boost controller is installed so that the arrow points toward the wastegate actuator
- Check the joining hoses for splits, cracks or loose connection and are the correct size for the application
- Check to see if the boost controller is blocked or contaminated with dirt or debris
- Ensure that there is nothing but the boost controller in the hose between the pressure source and the wastegate actuator, ie tee pieces for boost gauge or to factory boost solenoid.
- Pressure test the wastegate actuator for leakage, the diaphragm or housing may be cracked or split
- Check that the wastegate is operating correctly

The Turbosmart Pledge

DO NOT USE ANY TURBOSMART PRODUCT UNTIL YOU HAVE CAREFULLY READ AND UNDERSTOOD THE FOLLOWING AGREEMENT.

Please call if you have any questions or do not understand this agreement. Refer to our brochure, website or catalogue for terms and conditions and further information regarding your product. Turbosmart appreciates your business and pride ourselves on our customer service. We are always happy to offer you advice and will provide you with help in any way we can. The purpose of this agreement is to avoid any problems or hard feelings.

We sometimes make mistakes, as do our dealers, distributors and suppliers. Even customers can sometimes order the wrong parts. Do not use, modify, install, trial assemble, nick, drop, scratch or adjust any part until you first check for any damage. Damage must be reported immediately. NO EXCEPTIONS. If there are any components missing please contact your authorised reseller immediately upon receipt of your shipment. Missing components must be reported within five (5) business days of receipt. Parts returned for any reason MUST BE IN RESALABLE CONDITION. It is YOUR responsibility, "THE CUSTOMER" to carefully package any returns to avoid shipping damage. Insurance is highly recommended. Credit cannot be issued for damaged goods.

Turbosmart Pty Ltd warranties the quality of the products it designs and manufactures to be free of defects in material and workmanship. This limited warranty is extended only to the original purchaser and may not be transferred or assigned. This limited warranty applies to any product, which after careful inspection by Turbosmart Pty Ltd, after receipt of the product from our authorised reseller, is found to have a defect in either material or workmanship. Any modifications to the product will void any and all warranties and will not be exchanged. Before installation, check new car warranty. Turbosmart Pty Ltd is not responsible for voiding any original manufactures warranty.

All warranty claims must be returned to the authorised reseller, you must return the product and sales receipt, at your own expense, accompanied by a letter stating the reason for the claim. Proof of purchase must be provided with any warranty claim and will be verified with the authorised reseller from which the product was purchased.

If all the above procedures are followed, and the product is found to be defective in either workmanship or material, Turbosmart Pty Ltd shall either repair or replace the product, at its sole discretion, and sole cost. This limited warranty does not cover or apply to any personal injury, labour charges or any other incidental costs or damages caused by the defective product. The individual purchaser acknowledges and agrees that the disclaimer of any liability for personal injury is a material term for this agreement and the individual purchaser agrees to indemnify Turbosmart Pty Ltd and to hold Turbosmart Pty Ltd harmless for any claim related to the item of the equipment purchased. Under no circumstances will Turbosmart Pty Ltd be liable for any damages or expenses by reason of use or sale of any such equipment.

THIS LIMITED WARRANTY IS THE ONLY EXPRESS WARRANTY, WHICH APPLIES TO TURBOSMART PTY LTD PRODUCT AS EXPRESSLY GIVEN IN LIEU OF ANY OTHER WARRANTY EXPRESSED OR IMPLIED, INCLUDING THAT OF MERCHANTABILITY. ANY IMPLIED WARRANTY INCLUDING THAT OF MERCHANTABILITY AND/OR FITNESS FOR A PARTICULAR PURPOSE IS HEREBY LIMITED BY THE SAME TERMS AND TIME LIMITATIONS SET FORTH IN THIS LIMITED EXPRESS WARRANTY AND OTHERWISE EXCLUDED.

EXCEPT FOR THOSE OBLIGATIONS ASSUMED HEREIN, TURBOSMART PTY LTD ASSUMES NO OTHER OBLIGATIONS IN CONNECTION WITH THE SALE OF ITS PRODUCTS.

IN THE EVENT THAT THE INDIVIDUAL PURCHASER DOES NOT AGREE WITH THIS AGREEMENT THE BUYER MAY PROMPTLY RETURN THIS PRODUCT, IN A NEW AND UN-USED CONDITION, WITH A DATED PROOF OF PURCHASE, TO THE PLACE OF PURCHASE WITHIN SIXTY (60) DAYS FROM THE DATE OF PURCHASE FOR A FULL REFUND.

THE INSTALLATION OF THIS PRODUCT INDICATES THAT THE INDIVIDUAL PURCHASER HAS READ AND UNDERSTOOD THIS AGREEMENT AND ACCEPTS ITS TERMS AND CONDITIONS.

Happy motoring!
